Professional Summary

Python Developer with 1.5years of experience building scalable backend systems using Django and Django REST Framework. Specialized in developing RESTful APIs, designing data pipelines, and automating workflows for large-scale image and annotation processing systems. Experienced with AWS S3, IAM, and data format transformations across COCO, YOLO, and XML. Additionally, developed full-stack applications using REACT, implementing secure JWT-based authentication, role-based access control, and asynchronous processing with Celery and Redis. Strong focus on clean, maintainable code and efficient system design.

Skills

- Programming & Frameworks: Python, Django, Django REST Framework,
- Web Technologies: React, Tailwind CSS, HTML5, CSS3, Bootstrap, JavaScript
- Database: MySQL, Django ORM
- APIs & Tools: RESTful APIs, JWT Authentication, Postman
- Cloud: AWS (S3, IAM)
- Data & Image Processing: COCO, XML, YAML, YOLO, CSV, JSON, OpenCV, PIL
- Version Control: GitHub
- Soft Skills: Problem-solving, Teamwork, Adaptability, Communication, Time Management, Attention to Detail

Work Experience

Webfolks from Infolks Pvt Ltd Mar 2024 — Jul 2025
Junior Python Developer Mannarkkad, Kerala

- Built and optimized data pipelines for converting datasets across COCO, XML, YAML, YOLO, CSV, JSON formats.
- Automated annotation workflows using Python-based tools, improving team efficiency and reducing manual effort.
- Developed visualization and QA scripts using OpenCV & PIL, enabling quick validation of annotations.
- Created custom Tkinter tools to support annotators with repetitive or complex tasks.
- Evaluated new annotation tools and provided technical feedback to improve workflow performance.
- Managed AWS S3 buckets, configured IAM policies, and optimized data storage processes.
- Collaborated with project coordinators and team leads to meet technical requirements and delivery timelines.

Beinex Consulting Pvt Ltd Sep 2023 — Jan 2024
Backend Development Trainee Kochi, Kerala

- Gained hands-on experience building backend services using Django and Django REST Framework, focusing on clean, scalable API design.
- Developed and tested RESTful API endpoints with proper serialization, validation, and authentication mechanisms.
- Implemented backend modules following MVC architecture and REST principles, reinforcing industry best practices.
- Strengthened Python and Django fundamentals through daily coding tasks, debugging exercises, and mini-projects.
- Collaborated with mentors and peers during reviews, improving code quality, documentation, and problem-solving skills.

Wexo Ventures Pvt Ltd Dec 2022 — Mar 2023
Python Intern Kochi, Kerala

- Assisted in resolving backend issues, improving system stability and enhancing overall user experience
- Contributed to the development and configuration of franchise management modules, supporting smoother internal operations.
- Worked closely with senior developers to identify, debug, and fix production issues, reducing turnaround time.
- Applied Python-based solutions to support backend workflows and data handling tasks.
- Gained real-world exposure to collaborative development environments, version control, and production support processes

Projects

ResolveX – Smart Ticket Resolution System | Django, DRF, JWT, React, MySQL, Celery, Redis, Chart.js/Recharts

- Developed a scalable full-stack ticket management system using React.js, Django, and Django REST Framework, enabling clients to raise, track, and resolve service requests.
- Built secure RESTful APIs with DRF, implementing JWT authentication and role-based access control.
- Designed and implemented the ticket lifecycle workflow using Django ORM and MySQL, ensuring efficient data handling and query optimization.
- Engineered role-based modules with fine-grained permissions using Django Permissions & Authentication System
- Implemented asynchronous real-time notifications using Celery and Redis, improving system responsiveness and background task processing.
- Developed advanced filtering, reporting, and CSV export features using Python and Django ORM.
- Created interactive dashboards using Chart.js / Recharts to visualize ticket trends and performance metrics.

Ecommerce API | Django, Django REST Framework

- Designed and developed a complete E-commerce backend API using Django REST Framework, supporting user registration, JWT-based authentication, product listing, cart management, and order workflows.
- Implemented secure JWT authentication and role-based access control to differentiate user and admin permissions.
- Built admin modules for efficient product management, order tracking, and order status updates.
- Developed shopping cart and checkout functionality, enabling users to add, update, and remove items seamlessly.
- Integrated email notifications for order confirmation and status updates.
- Designed RESTful, user-friendly API endpoints with proper validation, error handling, and optimized responses.

Education

MES College of Engineering (MESCE) Aug 2018 — Jan 2021
Master of Computer Applications (MCA) Malappuram, Kerala

Certifications

Python–Django Full Stack Development - Luminar Technolab Kochi Mar 2022 — Sep 2022

Languages

English: Read, Write, and Speak, Malayalam: Read, Write, Speak, Tamil: Speak
